How to Connect to Logis Device Internet

♦ OEM iPads can use Logis device hotspots for internet access.

1. On Sonim Logis Device, swipe down on the screen with two fingers, then select the Settings icon

2. Select "Hotspot & Tethering"

3. Select WiFi hotspot

4. Toggle WiFi hotspot on

5. Navigate to iPad settings and select the WiFi hotspot using the name and password from the Logis device

♦ Keep in mind- just because you have a strong connection to the Logis device does not mean internet bandwidth will also be strong

♦ For additional troubleshooting, refer to the IT help document provided at check in or see your STL or TFL
